

## **BENEFITS OF ALOE VERA**

Aloe Vera plant is a member of the Lily Family, which is acactus type of growth. There are more than 200 species of Aloe Vera, some more nutritious than others.

Aloe Vera Barbadosis is most beneficial one.

The leaf contains Aloe Vera gel which is highly regarded. The gel appears to feature a “Wound hormone” that accelerates the rate of healing of injured surfaces.

Scientists have found that the Aloe Vera “gel” is a diverse mixture of

### **ANTIBIOTIC, ASTRINGENT, COAGULATING AGENT, PAIN INHIBITOR, CELL GROWTH STIMULATOR AND SCAR INHIBITOR.**

Although Scientists have not yet discovered all the secrets of why Aloe Vera works they do realize that it is the “Specific Mixture of the Ingredients” in Aloe Vera that is responsible for giving the plant its wide range of healing powers

**The features of Aloe Vera Gel, applied externally or internally, have been described in numerous scientific journals and reveals that Aloe Vera contains more than 70 essential ingredients including most Vitamins, Minerals, Enzymes, Protein and Amino Acids. In a recent study Aloe Vera also discovered to contain Vitamin B12.**

Used externally, many people attest to the effectiveness of Aloe Vera in helping to treat, for example:

**Burns, Sunburn, Sore muscles, Stings, Abrasions, Cold Sores, Bruises, Sprains, Arthritis.**

**Aloe Vera is Non-Toxic.**
